

Expository Reading/Writing
Module 3 Writing Task: Good Food/Bad Food Proposal

DUE: Friday, October 5, 2018
Submit to Turnitin.com prior to 11:59 pm
70 points

In this assignment, you will be selecting an issue that our society faces today regarding food and/or health associated with eating habits. You will research this issue in depth, and propose a solution to resolve the problem we face. In your solution, you must provide a reasonable timeline and budget, and explain who/what will be responsible for completing each step and supplying any necessary funding.

Please follow the series of steps below to complete your proposal.

1. Select a topic and have Mrs. Damilano approve it:

2. Determine possible solutions for your issue:

3. Write an introduction to give background on your issue. Give detailed information to “teach” your reader about the issue; imagine your reader knows nothing about it.
4. Create a survey to gather evidence from a variety of respondents about your issue.
5. Explain your chosen solution - give a very specific description of how you will solve the issue.
6. List and describe any tools and/or specific tasks necessary to carry out your solution.
This section will help you build ethos because it will showcase your knowledge in what it takes to achieve a satisfactory solution!
7. Make a timeline for your solution:
 - a. What steps will be taken?

- b. How long will each step take?
- c. Who/what is responsible for each step?
- d. How much will it cost?
- e. Who/what will provide funding?
- f. What will the end result be?

The timeline does NOT need to be in paragraph form. Bullet points, numbered lists, and/or a flowchart will work here.

Requirements:

- Paragraph format (except for Step 5)
- Minimum 500 words
- Include research! Use outside sources *with citations*
- Survey - include results! Results can be incorporated through:
 - Bar graph
 - Summary of responses
 - Particular noteworthy responses
- APA Style formatting

Section Suggestions: (each section can be between 150-200 words)

INTRODUCTION

- Hook statement (optional)
- State what the issue is and who it affects
 - Explain why it affects that group
- Explain why it is a problem (use as many details as possible!)
- BRIEFLY explain an overview of your solution
 - *Details for your solution will be outlined in the next paragraph*

SOLUTION

- Explain your solution in more detail:
 - What is it?
 - How will it help solve the issue?
 - How will it help affected people?
- Why is this the best solution?
- Are there any problems you can foresee?

TIMELINE

- Outline each specific step for your solution
- Provide a timeline of how long each step will take
- Research and include estimates for how much each step will cost
- Detail where money will come from and how
